

Follow the steps bellow to install the plugin in your Woocommerce store and start accepting payments in INNOVA.

1 Download plugin

Download the plugin from the official Innova website, over the following link:

<https://innovacoin.io>

Always download plugin from a verified source!

2 Install plugin

To install the plugin, navigate to [Plugins/Add New](#) in the main navigation. After that, press “Upload plugin” and choose file “woocommerce-innova.zip” in the upload form. Press “Install Now”.

Keyword Search

Plugins extend and expand the functionality of WordPress. You may automatically install plugins from the [WordPress Plugin Directory](#) or upload a button at the top of this page.

Once the plugin is installed successfully, press the button “Activate Pugin”.

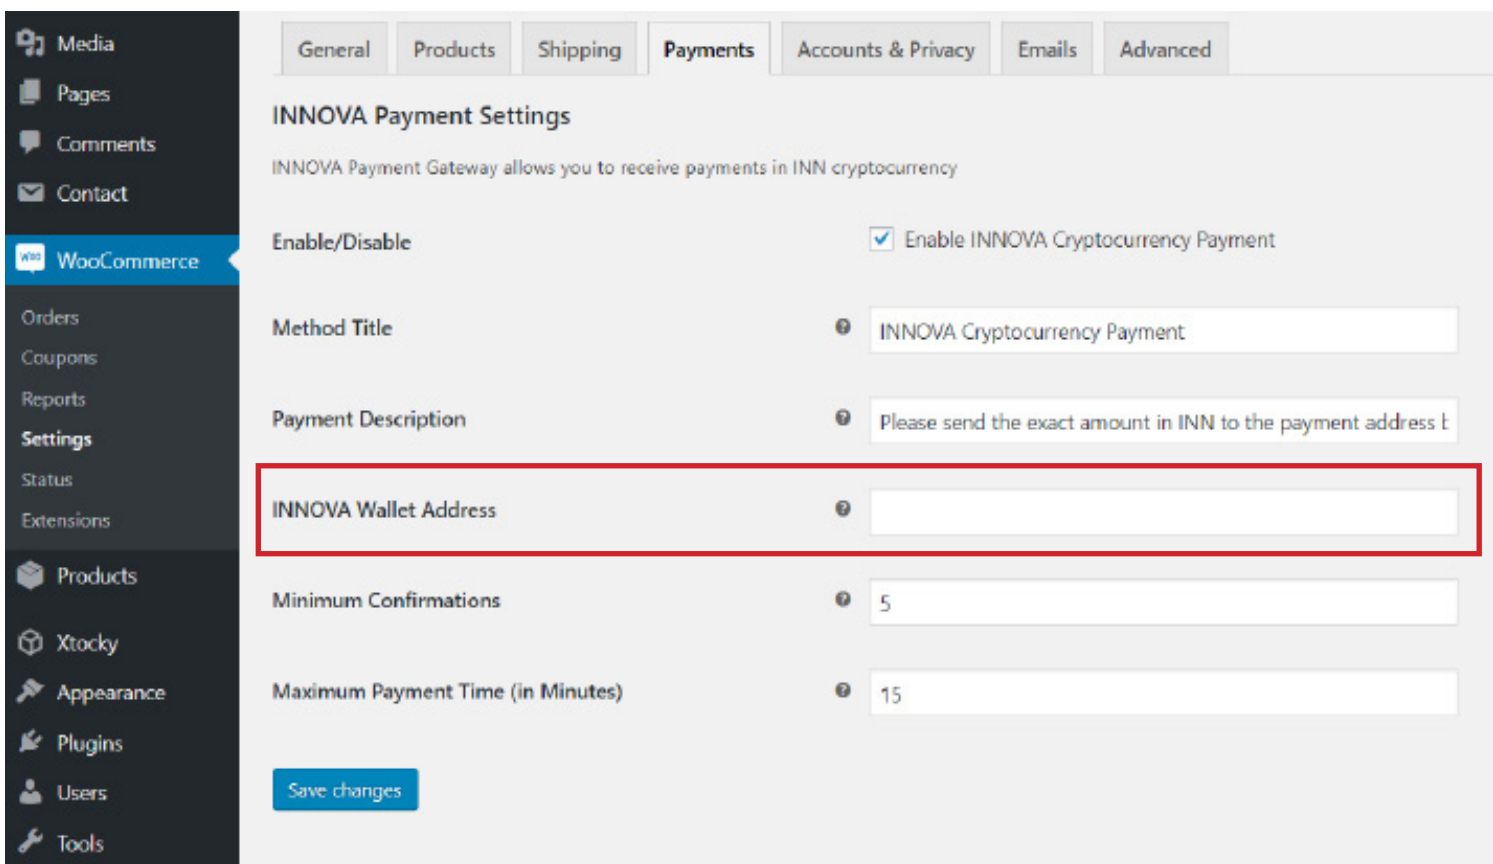

3 Configure settings

Before you start accepting the payments, you need to configure the settings with a payment address. In the list of plugins, click on “Settings link”.

In settings page, all settings are predefined with optimal configuration, however you can change them according to your preferences.

Add your INNOVA address in the field “INNOVA” payment address and save settings. Make sure that you only use this address for receiving payments on your e-commerce store.

That's all! You are ready now to start receiving payments in INNOVA!
